

Panasonic

LOGISCEND SYSTEM
InSights Software

➤ Unlock the full power of the Panasonic Logiscend System with InSights Software. This powerful analysis program tracks aggregate material flow data over time, giving deep insight into trends, performance, and most effective avenues for improvement.

Logiscend
Smart Material Flow. Brilliant Results.

InSights Software

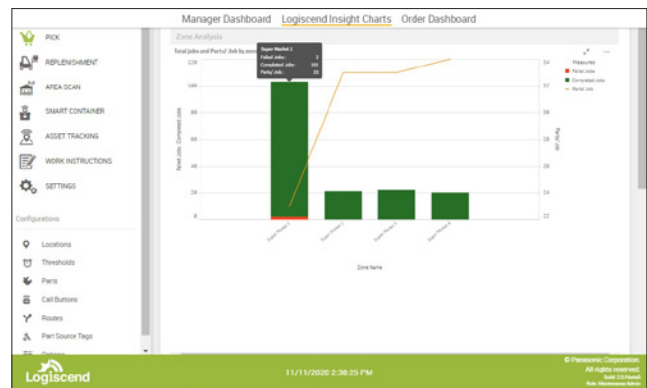

Data visualization and analytics for the visual factory

Improve efficiency. Lower cost. Reduce inventory. The power of industrial IoT can only be fully realized if the data that is generated is gathered, visualized and analyzed.

The Panasonic Logiscend InSights Software allows users to maximize efficiency and improve operational processes by looking at material flow data over time. Performance can be assessed across shifts, areas, people and plants. Identification of trends becomes possible through easy-to-read dashboards that track important metrics and key performance indicators.

- ✓ Empower decision-makers with insights from data for process improvements
- ✓ Target historical data for trend analysis and performance outcomes
- ✓ Quickly identify best practices as well as areas of improvement
- ✓ Achieve faster return on investment through efficiency improvement driven by data analysis
- ✓ View data archived up to seven years
- ✓ Browser-based interface — perform analysis anytime or anywhere
- ✓ Chart statistical information collected by Logiscend Pick and Replenishment Applications (soon to be expanded to all Applications) with standard graphs and charts for key performance indicators (e.g., Jobs by Zone, Job Time, Route Performance)
- ✓ Customize charts and visualization with our Professional Services group

Professional services

Panasonic is your trusted integrated solutions partner, committed to helping improve your organization’s key performance indicators (KPIs), including productivity, quality, and cost targets. Our ultimate goal is enterprise-wide operational excellence. We offer a full suite of services which can be individually customizable to provide all support necessary for a successful program. Our services include planning, installation and implementation, maintenance and support and engineering services.
